

**INVESTMENT GENERAL DIVISION  
PROCUREMENT DEPARTMENT**

**SUBJECT: Clarifications about the TED 061 "Tender for the supply of Wire ropes and other Load lifting devices"**

As regards to the tender questions, below the relevant clarifications are presented

**1. Question**

Article 13.3:

It is assumed that the Contract is signed on the 01/04/2021.

Should the product deliveries be done four (4) weeks about some of them and eleven weeks about the rest of the others after the contract sign date?

Or during the one year contract, will the THPA S.A proceed to the orders depending on the priorities, and the products will be delivered in four or eleven weeks after this date?

**Reply**

In Article 13.3 of the general terms of the RFP 061/2021, it is mentioned that the Contractor will deliver exceptionally the wire rope products in the required quantities type 3,7,8,9,10,11,15 and the wire rope slings type 1 in four (4) weeks after the date of the Contract sign.

The delivery time of all the other requested products will not exceed the eleven (11) weeks from the submission of the purchase order. This order with all the priorities including the type and the quantity of the product will be proceeded gradually, within one year.

**2. Question**

Article 7.2

Would offer be approved of wire ropes with a European Company as a manufacturer fulfilling all the certifications and having its construction Company located in Indonesia?

**Reply**

No. All the delivered products will be constructed in the European Union and U.S.A with exceptional Bulgaria and Romania with all the required certifications. Annex 3.

**3. Question**

Article 1:

Are all the required wire ropes be galvanized or some of them? Which of them.

**Reply**

All the products should be manufactured by galvanized wire ropes.

#### **4. Question**

In the case of being the Contractor, and because of the fact that all the wire ropes are certified by the EN 10204 / Type 3.1 of the manufacturer, including the **actual breaking load > than the minimum breaking load** , is it necessary to proceed with an extra proof test with a required load of 24-33% more than the required minimum breaking load? Is the certification EN 10204 / Type 3.1 enough about it according to the table in Annex 3?

#### **Reply**

Annex N3 of RFP:

Documentation 6: The Certification quality Test according to EN 10204/ Type 3.1 will be included in each wire rope at each individual reel delivery.

Annex N2 of the Technical Specifications of RFP:

Column 12: type Proof test

The certification of Proof Test will be included in the delivery of the wire ropes type 10-16 and 18-25 of the required products with the written breaking load for each type as it is presented in the same Table..
